1. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or fairly suggest a molding machine including a drive for moving one of two mold carriers and a power unit for generating a closing force between the two mold carriers when the two mold carriers are moved together, the power unit comprising a pressure cushion filled with a highly viscous composition that has a viscosity greater than that of hydraulic oil, as claimed in claim 1.

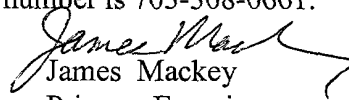

While the prior art discloses molding machines having drives and pressure cushions acting on mold carriers (pressure cushion 6 of Stachelin et al.; pressure cushion 13 of Bluml et al.; pressure cushion 11 of Kassner et al; pressure cushions 5 of Lampl et al.), the prior art of record does not teach or fairly suggest a molding machine as claimed wherein the pressure cushion is filled with a highly viscous composition that has a viscosity greater than that of hydraulic oil.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
